This section can replace the copied “recognised as a leading agency” section.

**Small Heading**

**WHY DIJIGRO**

**H2**

### **Digital Work With a Clear Purpose**

**Text**

A beautiful website or a busy marketing campaign is not enough on its own. The real value comes from how well every part of your digital presence works together.

At DIJIGRO, we focus on understanding the problem before building the solution. That means creating websites that support your marketing, content that answers real customer questions and campaigns that have a clear purpose.

### **Supporting Blocks**

#### **UNDERSTAND**

We learn about your business, customers, objectives and challenges.

#### **PLAN**

We identify the right digital channels, priorities and opportunities.

#### **CREATE**

We develop websites, content, campaigns and experiences around the strategy.

#### **IMPROVE**

We review performance, learn from the data and refine what we do next.

---

# DIJIGRO — ABOUT US

## SEO DETAILS

### Page Title:

About DIJIGRO | Digital Marketing, Web Design & Development

### Meta Description:

Learn about DIJIGRO and our journey from digital marketing training and services to delivering web design, development and digital marketing solutions.

---

## SECTION 1 — HERO

### Small Heading

### ABOUT DIJIGRO

### Building Better Digital Experiences

### Supporting Text

DIJIGRO is a digital marketing, web design and web development agency focused on helping businesses create a stronger presence online.

Our digital journey began in 2015. Today, we bring that experience together with creativity, technology and practical thinking to build digital solutions that help businesses move forward.

### CTA

### GET IN TOUCH

---

## SECTION 2 — OUR STORY

### Small Heading

### OUR STORY

### From Learning Digital to Building Digital Solutions

Our journey began in **2015 with SRJINFOWAYS**, where we started providing digital marketing training and services.

Over the years, we trained **250+ students in digital marketing** and worked with **nearly 100 clients**, gaining hands-on experience across different businesses, industries and digital challenges.

Teaching digital marketing gave us the opportunity to understand how people learn and use digital tools. Working with clients taught us something equally important—how businesses actually need those tools to deliver value.

We saw businesses looking for better visibility, stronger websites, useful content and effective ways to connect with their customers online.

That experience became the foundation for **DIJIGRO**.

DIJIGRO is the next chapter of our journey, bringing **digital marketing, web design and web development** together under one brand.

Our goal is simple: to create digital solutions that are easy to understand, useful for customers and focused on real business objectives.

---

## **SECTION 3 — OUR CORE VALUES**

### **Small Heading**

#### **OUR CORE VALUES**

##### **What Guides the Way We Work**

The right digital solution is not only about technology or creativity. It is also about the principles behind the work.

##### **CREATIVITY WITH PURPOSE**

We create ideas that are designed to solve problems, communicate clearly and make a meaningful difference.

##### **RESULTS THAT MATTER**

We focus on outcomes that support business goals rather than chasing numbers that look good but add little value.

##### **HONEST COMMUNICATION**

We believe in clear conversations, realistic expectations and straightforward recommendations.

##### **COLLABORATION**

We work with our clients as partners, combining our digital expertise with their knowledge of their business.

##### **CONTINUOUS LEARNING**

Digital changes constantly. We keep learning, testing new ideas and adapting to create better solutions.

##### **QUALITY IN EVERY DETAIL**

From the smallest design element to the overall strategy, we believe good work comes from paying attention to the details.

---

## **SECTION 4 — OUR CULTURE**

### **Small Heading**

#### **OUR CULTURE**

##### **Curious Minds. Collaborative Work. Continuous Growth.**

We believe the best digital work happens when people are encouraged to learn, share ideas and think differently.

Our culture is built around curiosity, collaboration and continuous improvement. We give importance to open communication, practical thinking and the freedom to explore better ways of solving problems.

Our experience in digital marketing training has also shaped how we work—we believe knowledge becomes more valuable when it is shared.

We learn from every project, every challenge and every conversation. That mindset helps us keep improving our skills and delivering better digital experiences.

#### **Three Supporting Points**

##### **LEARN**

Stay curious. Keep developing. Keep adapting.

##### **COLLABORATE**

Share ideas. Listen carefully. Build together.

##### **GROW**

Learn from experience and continually improve.

---

Web Design Agency, Professional Web Design, Responsive Web Design, Business Website Design, Custom Web Design, Ecommerce Web Design, Website Redesign

---

## SECTION 1 — HERO

### Small Heading

## WEB DESIGN

### Websites Designed for People and Built for Business

Your website is often the first place people experience your brand.

We design professional, responsive websites that make your business easy to understand, simple to navigate and ready to turn visitors into enquiries, customers or opportunities.

Whether you need a new business website, an ecommerce store or a complete website redesign, we create the experience around your brand, audience and goals.

## **GET STARTED**

---

### **SECTION 2 — WEB DESIGN SERVICES**

#### **Small Heading**

#### **WHAT WE DESIGN**

##### **The Right Website for the Way You Do Business**

Different businesses need different types of websites. We create designs based on what your customers need to see, understand and do.

#### **BUSINESS WEBSITE DESIGN**

A professional website that clearly presents your business, services, expertise and contact information while creating a strong first impression.

#### **ECOMMERCE WEB DESIGN**

Online stores designed to make browsing, product discovery and purchasing straightforward across desktop and mobile devices.

#### **CORPORATE WEBSITE DESIGN**

Structured digital experiences for established businesses that need to communicate their capabilities, services, people and brand with clarity.

#### **LANDING PAGE DESIGN**

Focused pages built around a specific campaign, service, product or conversion goal.

#### **WEBSITE REDESIGN**

A fresh approach for outdated or underperforming websites, improving visual presentation, navigation, content structure and user experience.

#### **CUSTOM WEB DESIGN**

Unique website experiences created around specific business requirements rather than relying on a one-size-fits-all layout.

---

### **SECTION 3 — OUR DESIGN APPROACH**

#### **Small Heading**

#### **OUR APPROACH**

##### **Design That Looks Good, Works Well and Makes Sense**

Good web design is about more than choosing colours, fonts and images.

We think about how visitors arrive on your website, what they need to know, how quickly they can find it and what should happen next.

Our designs bring together:

#### **CLEAR STRUCTURE**

Important information is organised so visitors can understand your business without unnecessary complexity.

#### **USER EXPERIENCE**

Navigation, page layouts and interactions are designed to make the website comfortable and intuitive to use.

#### **RESPONSIVE DESIGN**

Your website is designed to work smoothly across desktops, tablets and mobile devices.

#### **BRAND CONSISTENCY**

The visual language of your website reflects your brand and creates a consistent experience across the site.

#### **CONVERSION-FOCUSED THINKING**

Calls to action, forms and key information are positioned with the customer journey in mind.

#### **SEO-FRIENDLY STRUCTURE**

The design and content structure are planned so the website can provide a strong foundation for search visibility.

---

## **SECTION 4 — FROM IDEA TO LAUNCH**

### **Small Heading**

#### **HOW WE WORK**

##### **A Clear Process From First Conversation to Launch**

We keep the web design process structured and collaborative, so you know what is happening at every stage.

#### **01 — DISCOVER**

We learn about your business, audience, competitors, existing website and goals.

#### **02 — PLAN**

We organise the content, page structure and user journey before moving into visual design.

#### **03 — DESIGN**

We create the visual direction and page layouts around your brand and customer experience.

#### **04 — REFINE**

You review the designs, provide feedback and we make the necessary improvements.

#### **05 — LAUNCH**

Once everything is ready, the approved design moves into development and prepares for launch.

### **Closing Line**

**A well-planned process creates a better website—and makes the journey easier for everyone involved.**

---

## **SECTION 5 — WHY YOUR WEBSITE MATTERS**

### **Small Heading**

#### **BEYOND GOOD DESIGN**

##### **Your Website Should Work as Part of Your Business**

A website is not simply an online brochure.

It can help people discover your business, understand your services, build confidence in your brand and take the next step.

That is why we think about your website from both sides:

#### **FOR YOUR CUSTOMERS**

Easy to navigate.

Easy to understand.

Easy to use.

Easy to take action.

#### **FOR YOUR BUSINESS**

Easy to manage.

Built around your goals.

Ready to support marketing.

Designed with future growth in mind.

### **Highlight**

**The goal is not just to create a beautiful website. The goal is to create a website that has a job to do.**

---

## **SECTION 6 — FAQ**

### **Small Heading**

#### **WEB DESIGN FAQ**

##### **What information do you need to start a website project?**

We usually begin with your business details, target audience, existing website, goals, preferred features and any brand materials you already have. This helps us understand the project before planning the design.

##### **Can you redesign my existing website?**

Yes. A redesign can address outdated visuals, confusing navigation, poor mobile experience, weak content structure or other areas that may be limiting the website.

**Do you design ecommerce websites?**

Yes. We can design ecommerce experiences around your products, customers and buying journey, with a focus on clear product presentation and a smooth shopping experience.

**Will the website work on mobile devices?**

Yes. Responsive design is part of our approach, so the layout and user experience are planned for different screen sizes.

**Can you design a website based on our existing brand?**

Yes. We can work with your existing logo, colours, typography and brand guidelines while creating a consistent website experience.

**Do you also provide website development?**

Yes. DIJIGRO provides both web design and web development, allowing the design and technical implementation to be planned together.

**Can you help with website content?**

Yes. Website design works best when content and layout are planned together. We can help structure the content so that important information is clear and easy to navigate.

**Can you improve an existing website instead of creating a new one?**

Yes. Depending on the condition of the existing site, we can identify what should be improved, redesigned or rebuilt rather than starting from scratch unnecessarily.

---

**SECTION 7 — FINAL CTA****Small Heading****READY TO BUILD?****Let's Create a Website Your Business Can Grow With**

Your next website should be more than a new design.

It should give your business a clearer online presence and give your customers a better experience.

Tell us what you want your website to achieve, and let's start from there.

Web Development Agency, Custom Web Development, Website Development, Ecommerce Development, WordPress Development, Web Application Development, Business Website Development

---

## SECTION 1 — HERO

### Small Heading

## WEB DEVELOPMENT

### Web Development Built Around Your Business

A website should do more than display information. It should work reliably, load smoothly and support the way your business operates.

DIJIGRO develops websites and web solutions that combine functionality, performance and usability, helping businesses turn their digital ideas into working experiences.

From business websites and ecommerce platforms to custom web applications, we develop solutions based on your requirements rather than forcing every project into the same structure.

### Primary CTA

## START YOUR PROJECT

### Secondary CTA

### Form Heading

### Have a Web Project in Mind?

### Form Text

Tell us what you want to build, improve or integrate. We'll help you identify the right development approach for your project.

**Button**

**LET'S TALK**

---

## **SECTION 2 — OUR WEB DEVELOPMENT SERVICES**

**Small Heading**

### **WHAT WE DEVELOP**

#### **From Business Websites to Custom Web Solutions**

Every project has different technical requirements. We choose the development approach according to the website, users, functionality and future needs.

#### **BUSINESS WEBSITE DEVELOPMENT**

We develop professional business websites with clear structure, responsive layouts and the functionality needed to present your business online and generate enquiries.

#### **WORDPRESS DEVELOPMENT**

Build on a flexible content management system that allows businesses to manage and update website content without depending on a developer for every small change.

#### **ECOMMERCE DEVELOPMENT**

Create online stores where customers can browse products, understand what you offer and complete purchases through a straightforward shopping experience.

#### **CUSTOM WEB DEVELOPMENT**

For projects that need functionality beyond a standard website, we develop tailored solutions around specific business processes, features and integrations.

#### **WEB APPLICATION DEVELOPMENT**

We build browser-based applications that help users perform tasks, access information or interact with your business through a dedicated online platform.

#### **WEBSITE REDEVELOPMENT**

When an existing website has technical, structural or performance limitations, we can rebuild or improve it while keeping the important parts of your existing digital presence in mind.

---

## **SECTION 3 — OUR APPROACH**

**Small Heading**

### **HOW WE DEVELOP**

#### **Build With Purpose. Not Just Code.**

Good development starts before the coding begins.

We first understand what the website needs to achieve, who will use it and what functionality is required. Then we create the technical foundation needed to make the experience work smoothly.

## **01 — UNDERSTAND**

We learn about your business, users, goals and technical requirements.

## **02 — PLAN**

We define the website structure, functionality, integrations and development requirements.

## **03 — DEVELOP**

We build the approved solution with attention to usability, performance, responsiveness and maintainability.

## **04 — TEST**

We check functionality, forms, navigation, responsiveness and important user journeys before launch.

## **05 — LAUNCH**

Once everything is ready, we prepare the website for deployment and handover.

## **06 — IMPROVE**

As your business and requirements change, the website can be updated, extended and improved.

---

## **SECTION 4 — WHAT MAKES A GOOD WEBSITE**

### **Small Heading**

### **BEYOND DEVELOPMENT**

#### **A Website Should Work as Hard as Your Business**

Development is not successful simply because the website is live.

A good website should provide a reliable experience for visitors while giving the business a strong foundation for future growth.

### **PERFORMANCE**

We aim to create websites that respond quickly and provide a smooth browsing experience.

### **RESPONSIVE EXPERIENCE**

The website should work effectively across desktop, tablet and mobile devices.

### **SCALABLE STRUCTURE**

Your website should have room to evolve as your business, content and functionality grow.

### **EASY CONTENT MANAGEMENT**

Where a CMS is appropriate, we make it easier for your team to manage and update the website.

## **INTEGRATION**

Websites can connect with relevant tools, platforms and business systems when the project requires it.

## **SEO-READY FOUNDATION**

Technical structure, page organisation and performance are considered so the website has a stronger foundation for search visibility.

---

## **SECTION 5 — TECHNOLOGY THAT FITS THE PROJECT**

### **Small Heading**

### **THE RIGHT TECHNOLOGY**

#### **We Choose Technology Based on What You Need**

There is no single technology that is right for every website.

The technology and development approach should depend on factors such as the type of website, required functionality, expected traffic, integrations, content management needs and future plans.

For some businesses, a content management system may be the most practical choice. Other projects may require a more customised development approach.

### **Closing Text**

**We focus on choosing technology that solves the problem—not technology simply because it is new.**

---

## **SECTION 6 — WEB DESIGN + DEVELOPMENT**

### **Small Heading**

### **DESIGN MEETS DEVELOPMENT**

#### **From Visual Idea to Working Website**

A great design is only the beginning.

Our web design and development capabilities can work together so the visual experience and technical implementation are considered as one project.

This means we can look at how a page should feel, how it should function and how users should move through the website before bringing the final experience to life.

### **Supporting Points**

#### **DESIGN**

Clear layouts and user-focused experiences.

#### **DEVELOPMENT**

Reliable functionality and technical implementation.

## **EXPERIENCE**

A website where design and functionality work together.

## **CTA**

## **EXPLORE WEB DESIGN**

---

### **SECTION 7 — FAQ**

#### **Small Heading**

#### **WEB DEVELOPMENT FAQ**

##### **What is web development?**

Web development is the process of building the functional and technical parts of a website or web application. It includes everything from page functionality and content management to integrations and interactive features.

##### **Can you develop a website from an existing design?**

Yes. We can take an approved website design and convert it into a fully functional, responsive website.

##### **Can you redesign and redevelop my existing website?**

Yes. We can assess the existing website and determine whether it is better to improve specific areas or rebuild the platform.

##### **Do you build ecommerce websites?**

Yes. We develop ecommerce websites based on your products, customers, required features and purchasing process.

##### **Do you develop custom web applications?**

Yes. When a business requires functionality beyond a standard website, we can plan and develop a tailored web application around the specific requirements.

##### **Can you develop WordPress websites?**

Yes. WordPress can be used where it is a suitable choice for the project's content management and functionality requirements.

##### **Will the website work on mobile devices?**

Yes. Responsive development is considered so the website can adapt to different screen sizes and devices.

##### **Can you integrate third-party tools?**

Where technically appropriate, we can integrate websites with relevant external platforms, services and business systems.

##### **Can you provide website maintenance after launch?**

Yes. Ongoing maintenance, updates and improvements can be planned according to the website and your business requirements.

---

## **SECTION 8 — FINAL CTA**

### **Small Heading**

#### **HAVE AN IDEA?**

##### **Let's Turn Your Digital Idea Into a Working Website**

Whether you are starting a new website, rebuilding an existing one or developing a custom online solution, the right technical foundation can make all the difference.

Tell us what you need to build and where you want to go next.

# DIJIGRO — ECOMMERCE WEBSITE

## SEO DETAILS

### Page Title:

Ecommerce Website Design & Development | DIJIGRO

### Meta Description:

DIJIGRO creates ecommerce websites designed for easy shopping, clear product discovery, smooth checkout and a better online buying experience.

### Suggested URL:

/services/web/ecommerce

### Primary Keyword:

Ecommerce Website Design & Development

### Secondary Keywords:

Ecommerce Website Development, Ecommerce Web Design, Online Store Development, Ecommerce Website Design, Online Shopping Website, Ecommerce Development

---

## SECTION 1 — HERO

### Small Heading

## ECOMMERCE

### Build an Online Store That Makes Buying Simple

Selling online is more than putting products on a website.

Your customers need to find the right products quickly, understand what they are buying, trust your business and complete their purchase without unnecessary friction.

DIJIGRO creates ecommerce websites that bring together **design, functionality and user experience** to help businesses build a stronger online store.

Whether you are launching a new online shop or improving an existing one, we build around your products, customers and business goals.

### Primary CTA

## BUILD MY ONLINE STORE

### Form Text

Tell us about your products, business and ecommerce requirements. We'll help you identify the right approach for your online store.

**Button**

**START A CONVERSATION**

---

## **SECTION 2 — WHAT WE CREATE**

**Small Heading**

### **OUR ECOMMERCE SOLUTIONS**

#### **Everything Your Store Needs to Sell Online**

We design and develop ecommerce experiences around the complete customer journey—from discovering a product to placing an order.

#### **ONLINE STORE DESIGN**

Create a professional storefront that reflects your brand and makes products easy to browse and understand.

#### **PRODUCT & CATEGORY PAGES**

Organise your products with clear categories, useful information, images and calls to action that help customers make informed decisions.

#### **SHOPPING CART & CHECKOUT**

Create a straightforward purchasing journey that reduces unnecessary steps and makes checkout easy to complete.

#### **PAYMENT INTEGRATION**

Connect your store with suitable payment solutions so customers can complete transactions through supported payment methods.

#### **ORDER & PRODUCT MANAGEMENT**

Build practical systems for managing products, prices, orders and other essential store information.

#### **MOBILE SHOPPING EXPERIENCE**

Make sure customers can browse products and complete purchases comfortably across different screen sizes.

#### **INTEGRATIONS**

Connect your ecommerce website with relevant business tools and third-party services where required.

---

## **SECTION 3 — OUR APPROACH**

**Small Heading**

## HOW WE BUILD

### **Designed Around Your Customers. Built Around Your Business.**

A successful ecommerce website has to work for two audiences: the people shopping on it and the business managing it.

That is why we consider the complete ecommerce experience before development begins.

#### **01 — UNDERSTAND**

We learn about your products, customers, competitors, existing systems and business objectives.

#### **02 — PLAN**

We map the store structure, product categories, customer journey, required features and technical requirements.

#### **03 — DESIGN**

We create a shopping experience that makes your products easy to discover, understand and explore.

#### **04 — DEVELOP**

We turn the approved design into a functional ecommerce website with the required features and integrations.

#### **05 — TEST**

We check important journeys such as navigation, product browsing, cart actions, checkout, forms and mobile usability.

#### **06 — LAUNCH**

After final checks and approval, your online store is prepared for launch.

### **Closing Line**

**A better shopping experience starts with thoughtful planning.**

---

## **SECTION 4 — WHAT MAKES A BETTER ONLINE STORE**

### **Small Heading**

#### **BUILT FOR THE CUSTOMER**

##### **More Than a Product Catalogue**

An ecommerce website should make the buying decision easier.

That means giving customers the information they need while removing unnecessary obstacles from the shopping journey.

#### **EASY TO NAVIGATE**

Customers should be able to move from category to product to checkout without getting lost.

## **CLEAR PRODUCT INFORMATION**

Good product presentation helps customers understand features, benefits, pricing and available options.

## **TRUST & CONFIDENCE**

A professional shopping experience, clear information and a reliable checkout help create confidence throughout the buying journey.

## **FAST & RESPONSIVE**

Your store should provide a smooth experience across mobile, tablet and desktop devices.

## **READY FOR SEARCH**

The website structure can be planned with search visibility in mind, creating a stronger foundation for ecommerce SEO.

## **READY TO GROW**

Your ecommerce website should be able to evolve as your product range, customers and business requirements change.

---

## **SECTION 5 — ECOMMERCE DESIGN + DEVELOPMENT**

### **Small Heading**

#### **FROM DESIGN TO DELIVERY**

##### **One Connected Ecommerce Experience**

Ecommerce design and development should not work as two completely separate processes.

The visual experience influences how customers shop, while the technical foundation determines how reliably the store works.

DIJIGRO brings both sides together to create ecommerce websites where **design, usability and functionality** support each other.

From product presentation and navigation to shopping carts, checkout and integrations, every part has a role in the overall customer journey.

### **Highlight**

**We don't just build an online store. We build the experience around how your customers shop.**

---

## **SECTION 6 — FAQ**

### **Small Heading**

#### **ECOMMERCE FAQ**

**Can you build a new ecommerce website from scratch?**

Yes. We can plan, design and develop a new ecommerce website based on your products, customers, business model and required features.

**Can you redesign my existing online store?**

Yes. We can review your existing store and identify opportunities to improve its design, structure, usability and functionality.

**Can I manage products and orders myself?**

Yes. Where a suitable ecommerce platform or content management system is used, your team can manage products, categories, orders and other store content.

**Can you integrate payment gateways?**

Yes. We can integrate suitable payment solutions based on the platform, business requirements and available payment provider options.

**Will my ecommerce website work on mobile?**

Yes. The store is designed and developed with responsive layouts so customers can browse and shop across different devices.

**Can you help with ecommerce SEO?**

Yes. We can build the website with an SEO-friendly structure, and DIJIGRO also offers dedicated SEO services for businesses that want ongoing organic search growth.

**Can you connect the store with other systems?**

Where technically suitable, ecommerce websites can be connected with relevant third-party tools, business systems and services.

**Can you add more features later?**

Yes. We can plan the website with future growth in mind so additional features and improvements can be introduced as your business develops.

---

**SECTION 7 — FINAL CTA**

**Small Heading**

**READY TO SELL ONLINE?**

**Let's Build an Ecommerce Experience Your Customers Will Enjoy**

Whether you are launching your first online store or looking to improve an existing one, the right ecommerce website can give your business a stronger foundation for online sales.

Tell us what you sell, what you want to achieve and what your current challenges are.

**Primary Keyword:**

SEO Services

**Secondary Keywords:**

SEO Agency, Search Engine Optimization, AEO Services, Answer Engine Optimization, GEO Services, Generative Engine Optimization, Technical SEO, Local SEO, On-Page SEO, Ecommerce SEO

---

## SECTION 1 — HERO

**Small Heading**

**SEO • AEO • GEO**

**Be Found Where Your Customers Are Searching**

Search is changing.

People are no longer discovering businesses only through traditional search results. They are also asking questions, comparing options and looking for recommendations through AI-powered search experiences.

DIJIGRO helps businesses build a stronger and more discoverable online presence through **SEO, Answer Engine Optimization (AEO) and Generative Engine Optimization (GEO)**.

We focus on the fundamentals that matter: useful content, strong technical foundations, clear information, relevant topics and a website that search systems can understand.

**Primary CTA**

**START YOUR SEO PROJECT**

**Secondary CTA**

**GET A FREE SEO AUDIT**

**Form Heading**

## **Want to Improve Your Search Visibility?**

### **Form Text**

Share your website with us. We'll look at your current search presence and identify areas that may be limiting your organic visibility.

### **Button**

**GET MY SEO AUDIT**

---

## **SECTION 2 — SEO, AEO & GEO**

### **Small Heading**

### **SEARCH VISIBILITY, REIMAGINED**

**SEO for Search. AEO for Answers. GEO for AI Discovery.**

Search is becoming more conversational and more diverse. Your customers may find your business through a traditional search result, an answer to a specific question or an AI-generated response.

Our approach connects these opportunities rather than treating them as separate activities.

### **SEO — SEARCH ENGINE OPTIMIZATION**

We improve your website's ability to be discovered, crawled, understood and surfaced in organic search.

This includes technical SEO, content optimisation, search intent, internal linking, site structure and other foundational improvements.

### **AEO — ANSWER ENGINE OPTIMIZATION**

People increasingly search by asking complete questions rather than entering a few keywords.

AEO focuses on creating clear, well-structured information that directly answers relevant questions and makes your content easier for answer-focused systems to understand.

### **GEO — GENERATIVE ENGINE OPTIMIZATION**

AI-powered search experiences can synthesise information from multiple sources when answering a user's question.

GEO focuses on strengthening your content, expertise, structure and online presence so your information is easier for generative systems to interpret and potentially surface when relevant.

### **Highlight**

**One strategy. Multiple search experiences. A stronger digital presence.**

---

## **SECTION 3 — WHAT WE OPTIMIZE**

### **Small Heading**

## **OUR SEO SERVICES**

### **A Complete Foundation for Organic Visibility**

We look at the parts of your website and online presence that influence how effectively search systems can discover, understand and connect your business with relevant searches.

### **KEYWORD & SEARCH INTENT**

We identify the topics, questions and search terms that matter to your audience and map them to the right pages and stages of the customer journey.

### **TECHNICAL SEO**

We assess technical factors such as crawlability, indexing, site structure, page experience, mobile usability and other issues that can affect how search engines access and understand your website.

### **ON-PAGE SEO**

We improve page titles, headings, content structure, internal links, metadata and other on-page elements to make pages clearer and more relevant.

### **CONTENT OPTIMIZATION**

We create and improve useful content that answers real customer questions, demonstrates expertise and gives visitors a reason to trust your business.

### **LOCAL SEO**

For businesses serving specific areas, we improve local search visibility through accurate business information, relevant location signals and useful local content.

### **ECOMMERCE SEO**

We optimise online stores around product discovery, category structure, search intent, technical health and content so customers can find relevant products through organic search.

### **AUTHORITY & DIGITAL PRESENCE**

We work on relevant online signals that can strengthen your website's authority and visibility, using appropriate outreach, digital PR and link-building methods where they make sense.

### **SEO MONITORING & REPORTING**

We track meaningful search performance and use the data to identify opportunities, problems and areas for ongoing improvement.

---

## **SECTION 4 — BUILT FOR MODERN SEARCH**

### **Small Heading**

### **SEO FOR THE WAY SEARCH IS EVOLVING**

#### **Search Visibility Goes Beyond Blue Links**

A strong search strategy should account for how people discover information today.

We create content and optimise websites to make information easier to understand for both users and modern search systems.

### **ANSWER REAL QUESTIONS**

Create useful, direct information around the questions your customers actually ask.

### **BUILD TOPICAL DEPTH**

Develop connected content that demonstrates genuine understanding rather than isolated pages targeting individual keywords.

### **MAKE INFORMATION CLEAR**

Use logical headings, concise explanations, structured page content and meaningful internal links.

### **STRENGTHEN YOUR EXPERTISE**

Show who is behind your content, demonstrate experience and provide information people can trust.

### **KEEP CONTENT UNIQUE**

Give users something useful beyond generic information that can be found on hundreds of other websites.

### **OPTIMIZE THE FOUNDATION**

A technically sound, accessible and well-structured website gives your content a better foundation for discovery.

---

## **SECTION 5 — OUR APPROACH**

### **Small Heading**

### **HOW WE WORK**

#### **A Search Strategy Built Around Your Business**

We don't start with a list of keywords and immediately change your website.

We first understand your business, your audience, your competition and the opportunities available to you.

#### **01 — DISCOVER**

We review your website, current visibility, audience, competitors and business goals.

#### **02 — AUDIT**

We identify technical, content, structural and search-related opportunities.

#### **03 — STRATEGY**

We prioritise the work around search intent, business value and realistic opportunities.

#### **04 — OPTIMIZE**

We improve the website, content and supporting digital signals based on the strategy.

## **05 — MEASURE**

We monitor search visibility, traffic, engagement and relevant conversion signals.

## **06 — IMPROVE**

SEO is an ongoing process. We continue refining the strategy as search behaviour, your business and the digital landscape change.

### **Closing Line**

**We focus on sustainable improvement—not shortcuts or promises of instant rankings.**

---

## **SECTION 6 — WHY DIJIGRO**

### **Small Heading**

#### **WHY DIJIGRO**

##### **Search Strategy With a Business Perspective**

SEO should not become a never-ending list of technical tasks.

It should support what your business actually wants to achieve.

Our approach connects search visibility with your wider digital presence so that your website is built to attract the right audience and give them useful information when they arrive.

#### **PEOPLE-FIRST CONTENT**

We create and optimise content for people first, while making it easier for search systems to understand.

#### **TECHNICAL + CONTENT**

Strong visibility depends on both a sound technical foundation and genuinely useful information.

#### **SEARCH + AI**

We consider traditional search together with emerging AI-powered discovery experiences.

#### **CLEAR REPORTING**

We focus on understandable reporting so you can see what is being worked on and how the website is progressing.

#### **LONG-TERM THINKING**

We aim to build sustainable search visibility rather than rely on shortcuts that may not last.

---

## **SECTION 7 — FAQ**

### **Small Heading**

## **SEO, AEO & GEO FAQ**

### **What is SEO?**

SEO, or Search Engine Optimization, is the practice of improving a website so search engines can better discover, understand and surface its pages for relevant searches.

### **What is AEO?**

AEO stands for Answer Engine Optimization. It focuses on making information clear and useful for question-based searches and answer-focused search experiences.

### **What is GEO?**

GEO stands for Generative Engine Optimization. It is a term used for work intended to improve a website's visibility or representation in generative AI search experiences.

### **Is AEO replacing SEO?**

No. SEO remains an important foundation for search visibility, including Google's AI search experiences. AEO can be considered an extension of creating clear, useful answers for changing search behaviour rather than a replacement for SEO.

### **Is GEO a separate ranking system?**

Not in the sense of a separate Google ranking system. Google describes AEO and GEO as terms used for work focused on AI search visibility, while its guidance says the established SEO fundamentals remain relevant to generative AI features.

### **Can you guarantee Google rankings or AI visibility?**

No responsible SEO provider can guarantee a specific ranking or guarantee that a page will appear in an AI-generated answer. Our focus is on improving the technical quality, usefulness, relevance and clarity of your digital presence.

### **How long does SEO take to show results?**

SEO usually requires consistent work and measurement over time. The timeframe can vary significantly depending on your website, competition, industry, current authority, technical condition and the work required.

### **Do you provide Local SEO?**

Yes. We can improve local search visibility for businesses that serve specific locations or communities.

### **Can you optimize existing content?**

Yes. We can review existing pages and improve their structure, clarity, search intent alignment and usefulness instead of replacing everything unnecessarily.

### **Do you provide ongoing SEO services?**

Yes. Ongoing SEO can include technical improvements, content optimisation, search research, authority-building activities, monitoring and regular strategy refinement.

---

## **SECTION 8 — FINAL CTA**

### **Small Heading**

#### **READY TO BE FOUND?**

#### **Let's Build a Search Strategy That Moves With Your Customers**

Your customers are searching in new ways. Your digital presence should be ready for them.

Whether you need stronger Google visibility, better answers for searchers or a strategy for AI-powered discovery, we can help you build the right foundation.

### Secondary Keywords:

Performance Marketing Agency, Digital Performance Marketing, Paid Advertising, PPC Marketing, Conversion Rate Optimization, Lead Generation, Online Advertising

---

## SECTION 1 — HERO

### Small Heading

## PERFORMANCE MARKETING

### Marketing Focused on Measurable Growth

Getting traffic is only part of the job.

The real question is what happens after someone clicks your ad.

DIJIGRO creates and manages performance marketing campaigns designed to reach the right audience, generate meaningful actions and continuously improve campaign performance.

We connect **advertising, creative, landing pages, tracking and data** to create a clearer path from marketing spend to business outcomes.

**Button**

**GET STARTED**

---

## **SECTION 2 — WHAT WE DO**

**Small Heading**

### **PERFORMANCE MARKETING SERVICES**

#### **From Clicks to Meaningful Actions**

Performance marketing is not simply about buying more traffic. It is about understanding which activities contribute to your business goals and improving them over time.

#### **PAID SEARCH**

Reach people actively searching for products or services related to your business through targeted search advertising.

#### **PAID SOCIAL**

Run targeted advertising campaigns across relevant social platforms to reach potential customers based on audience, interests, behaviour and other available signals.

#### **LEAD GENERATION**

Build campaigns around meaningful actions such as enquiries, calls, registrations, bookings or other business-defined goals.

#### **ECOMMERCE ADVERTISING**

Promote products to relevant audiences and create campaigns designed around product discovery, consideration and purchase.

#### **REMARKETING**

Reconnect with people who have already interacted with your website, products or campaigns and guide them towards the next step.

#### **LANDING PAGE OPTIMISATION**

Improve the pages people reach after clicking an advertisement so that the experience is relevant, clear and focused on the intended action.

---

## **SECTION 3 — OUR APPROACH**

**Small Heading**

### **HOW WE WORK**

#### **Every Campaign Starts With a Clear Objective**

Before launching a campaign, we need to understand what success means for your business.

That could be generating qualified leads, increasing enquiries, driving online purchases or improving the efficiency of your advertising budget.

## **01 — DEFINE**

We identify your business objective, target audience, offer and key performance indicators.

## **02 — PLAN**

We select the appropriate channels, audiences, campaign structure, messaging and landing-page approach.

## **03 — LAUNCH**

Campaigns are launched with appropriate tracking and clearly defined conversion actions.

## **04 — MEASURE**

We monitor campaign data to understand what is generating traffic, engagement and conversions.

## **05 — OPTIMISE**

We refine targeting, creative, messaging, budgets, landing pages and other campaign elements based on performance.

## **06 — SCALE**

When a campaign demonstrates sustainable performance, we identify opportunities to expand while continuing to monitor efficiency.

### **Closing Line**

**The goal is not simply to spend more. It is to make every part of the campaign work more effectively.**

---

## **SECTION 4 — WHAT WE MEASURE**

### **Small Heading**

#### **MEASUREMENT MATTERS**

##### **Look Beyond Clicks and Impressions**

Numbers such as impressions, clicks and reach can tell you what happened at the top of the funnel.

But businesses also need to understand what happened after the click.

Depending on your objectives, we can monitor metrics such as:

#### **LEADS & ENQUIRIES**

Understand how many meaningful prospects your campaigns generate.

#### **CONVERSIONS**

Track important actions completed by visitors.

#### **COST PER LEAD / ACQUISITION**

Understand how efficiently your advertising budget is generating results.

## **CONVERSION RATE**

See how effectively your landing pages and campaigns turn visitors into actions.

## **AD SPEND**

Monitor how your budget is being distributed across campaigns and channels.

## **REVENUE / SALES**

Where appropriate and where reliable tracking is available, connect advertising activity with sales outcomes.

## **Highlight**

**Better measurement leads to better decisions.**

---

## **SECTION 5 — CAMPAIGN OPTIMISATION**

### **Small Heading**

## **CONTINUOUS OPTIMISATION**

### **We Learn From the Data and Improve**

A campaign should not be launched and left untouched.

Audience behaviour changes. Creative performance changes. Costs change. Offers change.

We review campaign data to identify what is working, what is underperforming and what should be tested next.

This can include:

### **AUDIENCE TESTING**

Compare different audience groups and targeting approaches.

### **AD CREATIVE TESTING**

Test different messages, visuals, formats and calls to action.

### **LANDING PAGE IMPROVEMENTS**

Identify friction and improve the experience after the ad click.

### **BUDGET OPTIMISATION**

Adjust budget allocation based on campaign performance and business priorities.

### **CONVERSION TRACKING**

Make sure important customer actions are being measured as accurately as possible.

## **Closing Statement**

**Performance marketing is a process of testing, learning and improving—not guessing.**

---

## **SECTION 6 — WHY DIJIGRO**

### **Small Heading**

## **WHY DIJIGRO**

### **Performance Marketing With the Bigger Picture in Mind**

Paid advertising does not operate in isolation.

A strong campaign also depends on the quality of the message, landing page, website experience, offer and follow-up process.

At DIJIGRO, we look at these connected elements so that your advertising has the right environment to perform.

### **BUSINESS-FOCUSED**

Campaigns are planned around your actual business objectives rather than vanity metrics alone.

### **DATA-LED**

We use campaign and conversion data to guide optimisation decisions.

### **CREATIVE + PERFORMANCE**

Strong performance requires both compelling creative and effective targeting.

### **TRANSPARENT**

We keep reporting understandable so you can see where your budget is going and what the campaign is achieving.

### **CONNECTED DIGITAL STRATEGY**

Where relevant, paid campaigns can work alongside SEO, web development, content and other digital activities.

---

## **SECTION 7 — FAQ**

### **Small Heading**

#### **PERFORMANCE MARKETING FAQ**

##### **What is performance marketing?**

Performance marketing is a form of digital advertising where campaigns are planned, measured and optimised around specific business actions or outcomes.

##### **What is the difference between performance marketing and digital marketing?**

Digital marketing is a broad term covering activities such as SEO, social media, content marketing, paid advertising and more. Performance marketing focuses specifically on measurable campaigns and outcomes.

##### **What platforms can you advertise on?**

The right platform depends on your audience and objectives. Depending on the campaign, this can include search engines, social media platforms, display networks and other relevant advertising channels.

**Can performance marketing generate leads?**

Yes. Campaigns can be designed around lead-generation actions such as forms, calls, enquiries, registrations or other meaningful conversions.

**Can you manage ecommerce advertising?**

Yes. Ecommerce campaigns can be structured around product discovery, website traffic, conversions and purchases.

**Do you create landing pages for campaigns?**

Yes. Where required, landing pages can be designed and developed specifically for campaigns to create a more focused post-click experience.

**How do you measure campaign success?**

Success depends on the objective. Relevant measures can include leads, conversions, cost per acquisition, conversion rate, revenue and other business-specific metrics.

**How quickly can performance marketing produce results?**

Paid advertising can begin generating data soon after campaigns launch, but meaningful optimisation usually requires ongoing testing and sufficient data. Results vary according to factors such as industry, audience, offer, competition, budget and campaign setup.

**Can you work with our existing campaigns?**

Yes. We can review existing campaigns, identify areas for improvement and optimise them rather than necessarily starting again.

**Can you track where our leads come from?**

Where suitable tracking is available, campaigns can be configured to measure important conversion actions and help identify which channels and campaigns are generating them.

---

**SECTION 8 — FINAL CTA****Small Heading****READY TO IMPROVE YOUR MARKETING PERFORMANCE?****Turn Your Advertising Budget Into Smarter Digital Campaigns**

Whether you are launching your first paid campaign or looking to improve an existing one, the right strategy, tracking and optimisation can make your advertising more effective.

**Button**

**GET STARTED**

---

## **SECTION 2 — PPC SERVICES**

**Small Heading**

**WHAT WE DO**

### **PPC Campaigns Built Around Your Goals**

A successful PPC campaign needs more than advertisements. It needs the right keywords, audience, messaging, landing experience, tracking and ongoing optimisation.

### **GOOGLE SEARCH ADS**

Reach people searching for products or services related to your business with targeted search campaigns built around relevant search intent.

### **KEYWORD RESEARCH & TARGETING**

Identify valuable search terms while filtering out irrelevant traffic so your budget is focused on searches that matter to your business.

### **AD CREATION & TESTING**

Create clear and relevant ad messaging and test different variations to understand which messages connect better with your audience.

### **PPC CAMPAIGN MANAGEMENT**

Manage campaign structure, budgets, bids, keywords and targeting while monitoring performance and making regular improvements.

### **GOOGLE SHOPPING ADS**

Promote products directly within shopping-focused search experiences with campaigns structured around your product catalogue and business objectives.

### **DISPLAY & REMARKETING**

Reconnect with people who have previously visited your website or interacted with your business where remarketing is appropriate for the campaign.

### **CONVERSION TRACKING**

Track meaningful actions such as enquiries, calls, forms, purchases or registrations so campaign performance can be evaluated beyond clicks.

---

## **SECTION 3 — OUR PPC APPROACH**

**Small Heading**

**HOW WE WORK**

## **Plan Carefully. Launch Clearly. Optimise Continuously.**

Every PPC campaign starts with understanding what you want your advertising to achieve.

### **01 — DISCOVER**

We understand your business, products or services, target audience, competition and campaign objectives.

### **02 — RESEARCH**

We research relevant search terms, audiences and opportunities to create a focused campaign structure.

### **03 — BUILD**

We create campaign groups, keywords, advertisements, targeting and conversion tracking based on the agreed strategy.

### **04 — LAUNCH**

Campaigns are launched with budgets, bidding and targeting configured around your objectives.

### **05 — MONITOR**

We review performance data to understand what is generating useful traffic and meaningful actions.

### **06 — OPTIMISE**

We continuously refine keywords, ads, bids, audiences, budgets and landing-page journeys based on what the data shows.

### **Closing Line**

**PPC works best when campaigns are managed as an ongoing process rather than a one-time setup.**

---

## **SECTION 4 — MAKE EVERY CLICK COUNT**

### **Small Heading**

### **BEYOND THE CLICK**

#### **The Ad Is Only the Beginning**

A person clicking your advertisement does not automatically mean the campaign has succeeded.

What happens after the click matters just as much.

That is why we consider the complete journey from search to conversion.

### **RELEVANT TRAFFIC**

Target searches and audiences that have a genuine connection with what your business offers.

### **CLEAR MESSAGING**

Make sure the advertisement communicates the value of your offer quickly and accurately.

## **BETTER LANDING EXPERIENCES**

Create a natural connection between the advertisement and the page visitors reach.

## **MEASURABLE ACTIONS**

Track the actions that actually matter to your business.

## **ONGOING IMPROVEMENT**

Use performance data to make better decisions about what to keep, change or test next.

### **Highlight**

**A click has value when it leads to the right next step.**

---

## **SECTION 5 — PPC FOR DIFFERENT BUSINESS GOALS**

### **Small Heading**

## **BUILT AROUND YOUR OBJECTIVE**

### **One PPC Strategy Does Not Fit Every Business**

Your campaign structure should reflect what you want customers to do.

## **GENERATE LEADS**

For businesses looking for enquiries, calls, registrations or consultations.

## **DRIVE ONLINE SALES**

For ecommerce businesses looking to bring qualified visitors to product and category pages.

## **PROMOTE A SERVICE**

For businesses that want to increase awareness and enquiries for a specific service.

## **REACH HIGH-INTENT SEARCHERS**

For businesses where timing and search intent play an important role in the buying decision.

## **SUPPORT A NEW LAUNCH**

For products, services or offers that need targeted visibility during a specific campaign period.

---

## **SECTION 6 — WHY DIJIGRO**

### **Small Heading**

## **WHY DIJIGRO**

### **PPC With a Clear Business Focus**

Paid advertising can become expensive when campaigns are built without a clear strategy or reliable measurement.

Our approach is built around understanding where your budget is going and what the campaign is trying to achieve.

#### **STRATEGY BEFORE SPEND**

We start by understanding your objectives before deciding how the campaign should be structured.

#### **DATA-LED OPTIMISATION**

Campaign decisions are guided by performance data rather than assumptions alone.

#### **TRANSPARENT MANAGEMENT**

We keep campaign activity understandable so you can see what is being worked on and why.

#### **CONVERSION-FOCUSED**

We look beyond impressions and clicks to meaningful actions such as leads, enquiries and sales.

#### **CONNECTED WITH YOUR WEBSITE**

Where needed, PPC can work alongside landing pages, web development, SEO and other digital activities.

---

### **SECTION 7 — FAQ**

#### **Small Heading**

#### **PPC FAQ**

##### **What is PPC advertising?**

PPC stands for Pay-Per-Click. It is a form of online advertising where advertisers generally pay when someone clicks on an advertisement.

##### **What is the difference between PPC and SEO?**

PPC uses paid advertising to gain visibility, while SEO focuses on improving organic visibility in search engines. They can be used together as part of a broader search strategy.

##### **Do you manage Google Ads?**

Yes. We can help with Google Ads campaign planning, setup, keyword targeting, ad creation, conversion tracking and ongoing optimisation.

##### **Can you manage an existing Google Ads account?**

Yes. We can review an existing account, identify opportunities and optimise the current campaigns where appropriate.

##### **Can PPC generate leads?**

Yes. PPC campaigns can be structured around lead-generation actions such as enquiry forms, phone calls, registrations and other defined conversions.

##### **Do you manage Google Shopping campaigns?**

Yes. We can support ecommerce businesses with Shopping campaigns and product-focused paid advertising.

**Can you run remarketing campaigns?**

Yes. Where suitable, remarketing can be used to reconnect with people who have previously interacted with your website or business.

**How do you measure PPC performance?**

Measurement depends on the campaign objective. Common measures include clicks, conversion rate, cost per conversion, leads, enquiries, purchases and revenue where reliable tracking is available.

**How quickly can PPC start generating traffic?**

Paid campaigns can begin receiving traffic once they are approved and active, but meaningful optimisation requires ongoing monitoring and sufficient performance data.

**Can you guarantee a specific number of leads or sales?**

No. PPC performance depends on factors such as competition, targeting, offer, landing page, budget, market conditions and customer behaviour. Campaigns should be tested and optimised rather than based on guaranteed outcomes.

---

**SECTION 8 — FINAL CTA**

**Small Heading**

**READY TO ADVERTISE SMARTER?**

## **SECTION 2 — SOCIAL MEDIA SERVICES**

**Small Heading**

### **WHAT WE DO**

#### **Everything You Need for a Stronger Social Presence**

Your social media should feel consistent, purposeful and relevant to the people you want to reach.

#### **SOCIAL MEDIA STRATEGY**

We create a practical social media direction based on your business goals, audience, brand voice and the platforms that make sense for you.

#### **CONTENT PLANNING**

We develop content calendars that give your social presence structure while leaving room for timely ideas, campaigns and relevant conversations.

#### **CONTENT CREATION**

From post copy and creative concepts to graphics, short-form video and other social content, we create material designed for each platform and audience.

#### **SOCIAL MEDIA MANAGEMENT**

We help manage your social channels with consistent publishing, content coordination and regular attention to your brand presence.

#### **COMMUNITY ENGAGEMENT**

We help your brand stay connected with its audience by monitoring comments, messages and interactions and responding in a suitable tone.

#### **PAID SOCIAL CAMPAIGNS**

Where paid promotion supports your goals, we can create targeted social campaigns and work with relevant audiences to extend the reach of your content and offers.

#### **SOCIAL MEDIA ANALYTICS**

We review engagement, reach, traffic and other meaningful metrics to understand what your audience responds to and where improvements can be made.

---

## **SECTION 3 — OUR APPROACH**

**Small Heading**

## **OUR APPROACH**

### **Content With a Reason Behind It**

Posting for the sake of posting rarely creates a strong brand presence.

Before creating content, we look at what your business wants to communicate, who you want to reach and what action you want your audience to take.

#### **01 — UNDERSTAND**

We learn about your business, audience, competitors, brand voice and social media goals.

#### **02 — STRATEGISE**

We define the content direction, platform priorities, themes and posting approach.

#### **03 — CREATE**

We develop content that reflects your brand and is adapted to the way people use each platform.

#### **04 — PUBLISH**

Content is organised and published according to the agreed content plan.

#### **05 — ENGAGE**

We help maintain conversations with your audience and keep your brand responsive.

#### **06 — IMPROVE**

We review performance and use what we learn to refine future content and strategy.

### **Closing Line**

**A strong social presence grows through consistency, relevance and continuous learning.**

---

## **SECTION 4 — CONTENT THAT FITS YOUR BRAND**

### **Small Heading**

#### **CONTENT THAT CONNECTS**

##### **Give People a Reason to Stop, Read and Remember**

Different businesses need different kinds of social content.

We can build a content mix around your brand and audience rather than relying on the same post format every week.

#### **EDUCATIONAL CONTENT**

Explain your products, services, ideas and expertise in a simple and useful way.

#### **BRAND CONTENT**

Show the people, values, work and personality behind your business.

#### **PRODUCT & SERVICE CONTENT**

Present what you offer clearly and show customers how it can help solve their needs.

### **ENGAGEMENT CONTENT**

Create conversations through questions, opinions, interactive formats and relevant topics.

### **PROMOTIONAL CONTENT**

Communicate offers, launches, events and campaigns without allowing your entire social feed to become promotional.

### **VIDEO & VISUAL CONTENT**

Use short-form video, graphics and other visual formats where they suit your audience and platform.

### **Highlight**

**The goal is not to create more content. It is to create content worth paying attention to.**

---

## **SECTION 5 — WHY DIJIGRO**

### **Small Heading**

### **WHY DIJIGRO**

#### **Social Media Built Around Your Brand**

A successful social media presence needs more than attractive posts.

It needs consistency, clear messaging and an understanding of the people on the other side of the screen.

### **STRATEGY BEFORE POSTING**

We start with a clear direction instead of publishing random content.

### **BRAND CONSISTENCY**

We keep your messaging, visual style and tone aligned across your social presence.

### **AUDIENCE FOCUSED**

Content is planned around what your audience is likely to find useful, relevant or interesting.

### **CREATIVE + PRACTICAL**

We combine creative ideas with content that serves a real communication or business purpose.

### **DATA AWARE**

We use performance information to understand what is working and where the content strategy can improve.

### **LONG-TERM THINKING**

We focus on building a recognisable and consistent social presence rather than chasing short-lived trends alone.

---

## **SECTION 6 — FAQ**

### **Small Heading**

#### **SOCIAL MEDIA FAQ**

##### **What is social media marketing?**

Social media marketing uses social platforms to help businesses communicate with their audience, build awareness, generate engagement and support broader marketing goals.

##### **Which social media platforms do you manage?**

The right platforms depend on your business, audience and objectives. We focus on the channels where your target audience is most relevant rather than trying to maintain every platform.

##### **Do you create social media content?**

Yes. We can support content planning, post copy, creative concepts, graphics and suitable short-form video content based on your requirements.

##### **Do you manage social media accounts?**

Yes. Social media management can include content planning, scheduling, publishing, monitoring and ongoing coordination.

##### **Can you help with Instagram and Facebook?**

Yes. Where these platforms are relevant to your audience and goals, we can plan and manage content for them.

##### **Can you manage LinkedIn for businesses?**

Yes. We can create professional social content for businesses and B2B brands where LinkedIn is an appropriate channel.

##### **Do you provide social media advertising?**

Yes. Paid social campaigns can be part of a broader social media strategy. Detailed paid campaign management is also covered through our Performance Marketing and PPC services.

##### **How often should a business post on social media?**

There is no single posting frequency that works for every business. The right schedule depends on your audience, content resources, platform and goals. Consistent, useful content is more important than posting simply to meet a number.

##### **Can you manage comments and messages?**

Yes. Depending on the agreed scope, we can help monitor and manage audience interactions and maintain an appropriate brand voice.

##### **How do you measure social media performance?**

Depending on your objectives, we can monitor measures such as reach, engagement, audience growth, content performance, website visits, enquiries and other meaningful actions.

## **Can social media generate leads and sales?**

Yes, social media can contribute to lead generation and sales, but results depend on factors such as the offer, audience, content, platform, campaign strategy and customer journey.

---

## **SECTION 7 — FINAL CTA**

### **Small Heading**

### **READY TO GET SOCIAL?**

### **Let's Give Your Brand Something Worth Talking About**

Your audience is already spending time online.

The opportunity is to create a social presence that gives them a reason to notice your brand, engage with it and remember it.

Tell us about your business and what you want social media to achieve.
